Dear Square Recruitment Team:

I am a developer who loves creative problem solving and generating tangible results. I love tools that streamlining workflow to get work done faster and cheaper, just like what Square has achieved for both businesses and customers: one elegant system to pull all tasks together and get them done fast. That's efficiency that I love.

I understand that you are looking for an agile developers to work across the stack. And I am the type of developer who thrive in high energy agile environment. I have been building applications delivering highly usable UI interface and strong back-ends. Recently, I have developed full stack applications with elegant front-ends with interactive features in technologies such as HTML5, CSS3, and Angular.js. I have built modern back-end to manage authentication and heavy data load in various back-end technologies such as: Node.js, Express.js, and PostgreSQL. Besides the aforementioned technologies, I am also experienced in other commonly used ones like: Ruby, Mongo.js, Heroku, Backbone.js, Mongoose.js, Sequelize jQuery, Angular Material. As a curious developer, I am always interested in learning and using new technologies.

I look forward to hear more details about the full stack challenges and feature you are focusing on right now and show you how I can contribute to improving your streamlined business solution for both sellers and buyers.

Thank you very much for your time

Huiqiang Huang
